Education

Malaviya National Institute of Technology (MNIT)

Aug 2024 – May 2028

B.Tech in Metallurgical & Materials Engineering | **Minor in Computer Science** | CGPA: 8.19

Jaipur, India

- **Computer Science and Engineering Minor Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, React Native

Databases & Caching: MongoDB, SQL(PostgreSQL), Firebase, Redis, Upstash

DevOps & Tools: Docker, Git, Amazon Web Services (AWS), CI/CD, Vercel, Postman

Experience

Open Source Contributor | GirlScript Summer of Code (GSSoC '26)

May 2026 – Present

React.js, Node.js, Docker, CI/CD

Remote

- Fixed database startup timing in **CodeGraphContext** (3.5k+ stars) using Docker healthchecks for FalkorDB and Neo4j, ensuring correct service sequencing and reliable container startups.
- Enhanced UI accessibility, reducing interface bugs by 25% and improving component reusability codebase-wide.

Technical Executive and Lead Developer | Blitzschlag '26

Nov 2025 – Feb 2026

React.js, Node.js, Firebase, React Native

Jaipur, India

- Led full-stack development of an event platform for 3,000+ concurrent users, implementing custom middleware for effective load balancing and system reliability.
- Engineered a cross-platform React Native app with shared state and offline sync, boosting user engagement by **40%**.

National Finalist | Smart India Hackathon (SIH 2025)

Dec 2025

Dhwani - Acoustic Classification System — DRDO Problem Statement

Remote

- Engineered a scalable acoustic classification system spanning **10+ sound domains**, reducing manual audio analysis by **70%**.
- Integrated the Gemini API for contextual querying over real-time streaming audio.

Projects

Secure Banking System Backend | Node.js, Express.js, MongoDB, Redis, JWT, Docker

Jan 2026 – Present

- Built a robust double-entry ledger system preventing double-spending during concurrent transactions; implemented Redis rate limiting for high traffic handling.
- Secured REST APIs with JWT authentication and mitigated XSS, CSRF, and SQL injection vulnerabilities following OWASP guidelines.

Luxenra – E-Commerce Platform | React, Node.js, MongoDB, Upstash, AWS, TanStack

Oct 2025 – July 2026

- Architected a MERN e-commerce platform, reducing API response times from **7s to 200–400ms** via Upstash caching for high-payload queries.
- Reduced initial bundle size by **90%** via code splitting and lazy loading, achieving a **100/100** Lighthouse SEO score.

Metallurgical Property Prediction Pipeline | Python, Scikit-Learn, XGBoost, Random Forest

Jan 2026 – Present

- Engineered an ML pipeline predicting mechanical limits (Yield Strength, UTS, Elongation) of Magnesium alloys based on compositional and process parameters.
- Trained tree-based models (XGBoost, Random Forest), achieving R^2 scores up to 0.85 on literature datasets.

Achievements

Global Rank 676, GSSoC '26: Achieved top percentile rank globally among thousands of open-source contributors.

SIH 2025 National Finalist: Ranked 6th nationally for a real-time acoustic inference architecture.

Winner, TechXcell Sphinx '25: Placed 1st out of 50+ teams by delivering a full-stack solution under strict constraints.

Runner-Up, Google Hackrux: Developed a production-grade automation platform within a 36-hour sprint.
